

South African Airlink Environmental Policy Statement

SA Airlink is a regional and domestic carrier based in South Africa. We are committed to minimising our impact on the environment by pursuing sustainable environmental practises, complying with applicable legal and other obligations and by minimising the impact of our activities and operations on the environment by continually:

- striving for the most efficient operations, in the air and on the ground, to prevent and reduce pollution;
- reducing our carbon and water footprint by operating using the most energy and water efficient practices;
- minimising waste and improving recycling initiatives at facilities and on our aircraft;
- utilising effective environmental management systems to better protect the natural environment;
- ensuring environmental awareness among employees;
- reviewing our environmental performance;
- working towards globally recognised industry goals for the reduction of CO₂ emissions;
- supporting and working with environmental partners to continually improve our environmental sustainability;
- ensuring compliance to all environmental regulations.
